Conference Theme

In recognition of issues that are commonplace globally the theme of the conference will be:

Worldwide problems – Global solutions

Worldwide problems – Global solutions

Presentations will focus on four key pillars

Conference Pillars

Skills

Speakers will cover education & training issues, apprenticeships, CPD and debate licensing v voluntary schemes.

Supply & Conservation

Consideration will be given to water efficient labelling schemes, using water wisely - saving water safely.

Sustainability

Achieving Net Zero, low temperature heating/hot water, electrification of heat, hydrogen. Role of designers & installers.

Safety (Home)

It will consider the impact of poor plumbing on public health, water associated problems i.e. Legionnaires' disease, scalding etc and non-compliant products.
